EDIConnect

Release 7

Apr 07, 2020

User Guide

CHAPTER 1

Other Versions

- Version 6

1.1 Acknowledgement Generation in EDIConnect

This video describes how to receive, validate, and generate acknowledgment for incoming transaction data using EDIConnect.

1.2 Custom Repository in EDIConnect - Customizing EDI Transactions

This video describes how to customize transaction sets, segments, composite elements, and elements in EDIConnect and store them in a repository.

1.3 EDI Builder and EDI destination file in EDIConnect

This video describes how to build an EDI transaction, validate and send it to a file in EDIConnect.

1.4 EDI Source Files and Parsing in EDIConnect

This video describes how to read an EDI file containing single or multiple transactions, parse the transactions, and use the parsed data.

1.5 Trade Partner Management in EDIConnect

This video describes how to create and maintain a profile for trade partners in EDIConnect.
